Apple's new how-to videos help us master iPadOS

BY KILLIAN BELL • 6:50 AM, SEPTEMBER 25, 2019 - Cult of Mac

Don't miss out on awesome iPadOS features.

Apple has dropped a series of how-to videos that help you get the most out of iPadOS. You can use them to master features like Slide Over, Split View, and brand-new gestures.

By now your iPad should be running iPadOS. But do you know how to use it?

There are lots of new features and improvements that have the potential to transform how your iPad works for you. But many of them are easy to miss if you don't go looking for them.

Apple's new how-to videos help you discover some of iPadOS' most powerful features — and show you how to use them properly.

Apple teaches us iPadOS

The first four videos, which follow the "Look what you can do with iPadOS" trailer, focus on Slide Over, Split View, editing text, and using QuickPath to type faster.

Most of the videos are short — the lengthiest is just one minute and 34 seconds — but they cram a lot in. They demonstrate how to use each feature, and why it's so useful.
